

Web & Mobile Application Development Offshore Development, Support & Maintenance

In today's world of business environment, it is not only crucial to have a presence on the Internet, but one that meets the needs of your customers and your business. A well-designed web site that offers solutions for customers can make the difference between success and failure. A great website can be an extremely valuable tool, especially for small business. It can "sell" your services 24 hours a day, 7 days a week, and it can be there when the potential customer needs information about your business, even in those times when you can't. With more and more people turning towards online services, website design and development is fast emerging modern day marketing tool. Websites act as a virtual supermarket with no physical or geographical limits and to tap this vast-potential business opportunity, a well designed and developed website is a prerequisite. iAi systems prides itself in understanding our customers and their business. This allows us to create a business solution using Internet technology to help our customers positively affect their bottom line.

We aim at bringing defect-free products to market, on time and within budget. Our competencies allow us to bring a high degree of technological expertise, dedication, and a complete hands on approach to the table. Our solutions provide you the highest quality at the lowest possible cost of ownership.

Website Development

Our skilled web designers and developers achieve various website projects from brochure sites to multi-functional web portals. iAi system has a large pool of resources and the required business and technical expertise to develop websites of any complexity.

Mobile Application Development

Our skilled web designers and developers achieve various website projects from brochure sites to multi-functional web portals. We provide complete front-end and back-end development based on the newest technologies and industry trends.

Web Application

iAi system delivers web applications that can keep you on the positive of the IT rhythm by hampering downtimes and accelerating output. We ensure that you are one-up on competition through valuable applications that are critical to reduce time-to-market periods and slice-down development costs.

Graphic Design

We offer a complete range of high quality offshore graphic design services to our clients, helping them to create original, memorable and meaningful images for their companies. We create images for our customers that effectively deliver their messages, present original ideas and have high visual impact, putting our customers ahead of their competition.

Flash/Flex Design

Flash is a magical tool that can make your website speak, dance and even laugh. This what we say creating action and interaction through our flash development services. Using flash we also offer a host of fast-paced multimedia presentations on the web.

Website Maintenance

iAi system will take on the task of routine website maintenance of existing websites & make whatever changes are needed, and when they are required. By outsourcing your website maintenance, you are free from the regular updates and expansions your website will need.

SEO/Internet Marketing

SEO is the process of improving the visibility of a web site or a web page in search engines via the "natural" or un-paid search results. Other forms of search engine marketing (SEM) target paid listings. In general, the earlier and more frequently a site appears in the search results list, the more visitors it will receive from the search engine.

Open Source Customization

iAi system can offer all kinds of open source customization and open source development for your project. Using open source platforms reduces your upfront costs and have zero licensing fees. iAi system can also assist with consultation on which open source platform to choose for your project.
